

OFFER 1 : OTICON OPN S from £3400 with free rechargeable unit (while stocks last)

Opn S breaks the limits of what has previously been possible with hearing aids using the following techniques:

Open Sound Navigator – Provides you with accurate information about your 360-degree soundscape even in difficult listening environments. This open sound experience will give you access to multiple speakers and allows you to decide what to focus on.

Open Sound Booster – Offers even more help in everyday noisy situations.

Open Sound Optimiser – Maximises optimal performance from your hearing aids by eliminating feedback.
